ADAM Issoufi

Senior Front-End Developer passionate about **UX** and **UI** Design

contact@issoufi.fr +33 6 95 75 86 32 Paris, France issoufi.fr linkedin.com/in/issoufiadam

SUMMARY

Senior Frontend Engineer at Sewan, owner of the React and TypeScript UI Kit of its B2B SaaS platform: 118 packages, the foundation of the screens of 15 product teams. Frontend architecture, design system, monorepo and DX.

I develop with AI agents, which I equip with skills, rules and specialized sub-agents: my site issoufi.fr is built by a fleet of Claude Code agents that I direct.

Code: issoufi.fr/code **Method**: issoufi.fr/method

SKILLS

Frontend: React.js, TypeScript, JavaScript, styled-components, GraphQL (Apollo), Redux.js, i18next, HTML, CSS

Design system and architecture: component library (UI Kit), composable packages, theming and white-label, monorepo (pnpm, Lerna), versioned packages on a private npm registry, Storybook

Quality and DX: Test Driven Development (TDD), unit testing (Vitest, Jest), code review, GitLab CI/CD, tooling (Vite, tsup, Webpack)

AI-augmented development: AI coding agents (Claude Code, Codex, OpenCode), specialized sub-agents, model and effort chosen per task, skills and rules, Git worktree

Backend and cloud: Node.js, Express.js, REST API, AWS Lambda (serverless), Docker, SQL

EXPERIENCE

Sewan Groupe · Permanent · Paris (75)

Senior Front-End Developer, Core team Oct. 2025 – Present

One of the three front-end developers of the Core team. I remain the owner of the UI Kit.

- UI Kit filters, one of the most used components: from a monolithic architecture to 13 composable packages, then migration of every page, some twenty inconsistencies fixed
- Development with AI agents (Claude Code, Codex, OpenCode), after GitHub Copilot then Cursor: MCP servers, specialized subagents, in-house skills and rules, three or four topics in parallel with Git worktree
- E-invoicing (France, Belgium, Spain), catalog and pricing, dashboards, integration of the PHP legacy

React.js · TypeScript · GraphQL · Node.js · monorepo · GitLab CI/CD

Senior Front-End Developer · UI Kit Owner Oct. 2022 – Sept. 2025

Owner of the internal UI Kit: **118 React and TypeScript packages** published on a private NPM registry, used by 15 product teams and by 47 of the 49 applications of the platform. Top contributor of the repository (1,040 commits among 80 contributors), author of 67 packages.

- Composable architecture: legacy single package split into separately versioned packages (Changesets), Table v2 designed as 11 packages with 15 features, virtualization included
- Customizable theme of the white-label offer; design tokens from the designers (Figma) ported into the theme (xstyled)
- Technical point of contact for 15 teams: author of the documentation and of the contribution processes, 458 merge requests approved over 11 repositories, led 5 epics and 5 scoping studies
- Tooling overhaul with no breaking change for the consuming teams: full TypeScript migration (771 files), npm to pnpm, Node 16 to 22, Jest to Vitest, Webpack to tsup and Vite
- Median merge request pipeline time cut from 17 min 24 s to 9 min (48% less, over 2,600 jobs); 661 tests, 93 of the 118 packages with at least one test

React.js · TypeScript · styled-components · Storybook · Vitest · Vite · tsup · pnpm · Lerna · GitLab CI/CD

Front-End Developer · Sophia GO application foundation June 2021 – Sept. 2022

Built the foundation of the React monorepo of **Sophia GO**, the new Sewan platform, from its start: 611 commits, 245 tickets delivered and three applications built from scratch.

- Application shell of the 49 applications of the monorepo: responsive layout, three-level navigation (organizations, sites, accounts)
- Front-end permissions and feature flagging (Optimizely), still used by every team to ship continuously

React.js · JavaScript · styled-components · Apollo GraphQL · Keycloak · Optimizely

Wibilong · Permanent · Paris (75)

Full-stack JavaScript Engineer (React.js, Redux.js, Node.js and AWS) Sept. 2019 – June 2021

Front-end and back-end features of three SaaS products, within a two-developer team: screens from the product mockups, Node.js APIs and AWS serverless functions.

Supralog · Apprenticeship · Antibes (06)

JavaScript Apprentice Developer (React.js and Redux.js) Jan. 2019 – Sept. 2019

Took part in the front-end overhaul of a certification information system in TypeScript, within a team of seven developers.

Full-Stack JavaScript Apprentice Developer (React.js, Redux.js, Next.js, Docker, GCP) June 2018 – Mar. 2019

In a pair, licensee portal of the **French Badminton Federation** (190,000 licensees): front-end pages and 3 microservices deployed.

Beepeers · Internship · Valbonne (06)

React.js Developer May 2017 – Aug. 2017

Website of the Dream Nation Festival 2017, with booking (ticket and hotel) and online payment.

EDUCATION

Master's degree in Computer Science (MIAGE), MBDS track
2016 – 2019 · Université de Nice

Two-year technical degree in Computer Science (DUT)
2014 – 2016 · IUT de Nice
