SUMMARY

Senior Frontend Engineer at Sewan, owner of the React and TypeScript UI Kit of its B2B SaaS platform: 118 packages, the foundation of the screens of 15 product teams. Frontend architecture, design system, monorepo and DX. I develop with AI agents, which I equip continuously with skills, rules and specialized sub-agents, to produce good code, not just code that works.

My site issoufi.fr is built by a fleet of Claude Code agents that I direct: tickets, Git worktrees, review agents and CI.

Code: github.com/AIssoufi/issoufi.fr **Method**: github.com/AIssoufi/issoufi.fr/tree/develop/docs/ai-workflow

SKILLS

Frontend: React.js, TypeScript, JavaScript, styled-components, GraphQL (Apollo), Redux.js, i18next, HTML, CSS, mockup integration

Design system and architecture: component library (UI Kit), composable packages, theming and white-label, monorepo (pnpm, Lerna), versioned packages on a private npm registry, Storybook

Quality and DX: Test Driven Development (TDD), unit testing (Vitest, Jest), code review, GitLab CI/CD, tooling (Vite, tsup, Webpack), TypeScript migration

AI-augmented development: AI coding agents (Claude Code, Codex, OpenCode), specialized sub-agents, model and effort chosen per task, skills and rules maintained continuously, three or four topics in parallel with Git worktree

Backend and cloud: Node.js, Express.js, REST API, AWS Lambda (serverless), Swagger, Docker, Kubernetes, Google Cloud Platform, SQL

EXPERIENCE

Sewan Groupe · Permanent · Paris (75)

Senior Front-End Developer, Core team — Oct. 2025 – Present

One of the three front-end developers of the Core team, born from the merger of Core Front and Core Back. I remain the owner of the UI Kit and work on cross-team topics.

- Development with AI agents (Claude Code, Codex, OpenCode): specialized subagents, in-house skills and rules, three or four topics in parallel with Git worktree
- E-invoicing (France, Belgium, Spain), catalog and pricing, stock and rental, dashboards, integration of the PHP legacy
- UI Kit filters, one of the most used components: from a monolithic architecture to 13 composable packages, then migration of every page, some twenty inconsistencies fixed

React.js · TypeScript · GraphQL · Node.js · monorepo · GitLab CI/CD

Senior Front-End Developer · UI Kit Owner — Oct. 2022 – Sept. 2025

Owner of the internal UI Kit of the Core Front team: **118 React and TypeScript packages** published on a private NPM registry, used by 15 product teams and by 47 of the 49 applications of the platform. Top contributor of the repository (1,040 commits among 80 contributors), author of 67 packages.

- Composable architecture: legacy single package split into separately versioned packages (Form into 9 packages), Table v2 designed as 11 packages with 15 features, virtualization included
- Customizable theme that makes the white-label offer possible, with automatically computed contrasts
- Technical point of contact for 15 teams (reviews, support, documentation), led 5 epics and 5 scoping studies

> **Tooling overhaul, with no breaking change for the consuming teams**
>
> - Full TypeScript migration: 771 files, no JavaScript left
> - npm to pnpm, Node 16 to 22, Jest to Vitest, Webpack to tsup and Vite, Storybook 5.3 to 9, Lerna 4 to 8
> - Median merge request pipeline time cut from 17 min 24 s to 9 min, 48% less, measured over 2,600 jobs
> - 661 tests in 142 files, 79% of the packages covered, 33 seconds to run

React.js · TypeScript · styled-components · Storybook · Vitest · Vite · tsup · pnpm · Lerna · GitLab CI/CD

Front-End Developer · Sophia GO application foundation

June 2021 – Sept. 2022

Built the foundation of the React monorepo of **Sophia GO**, the new Sewan platform, from its start: 611 commits and 245 tickets delivered.

- Application shell of the 49 applications of the monorepo: responsive layout, contextual sidebar, top bar, three-level navigation (organizations, sites, accounts)
- Front-end permissions and feature flagging (Optimizely), still used by every team to ship continuously
- Three applications built from scratch, bridges with the legacy platform, internationalization (i18next, Lokalise), first GraphQL resolvers

React.js · JavaScript · styled-components · Apollo GraphQL · Pullstate · Keycloak · Optimizely

Wibilong · Permanent · Paris (75)

Full-stack JavaScript Engineer (React.js, Redux.js, Node.js and AWS)

Sept. 2019 – June 2021

Front-end and back-end development of Wibilong's three SaaS products (WiService V3, WiManager, WiSell), within a two-developer team.

- Screens built from the product mockups, then the services they need (Node.js APIs and AWS serverless functions), documented with Swagger
- Production maintenance and bug fixing on the three products
- Took part in the technical choices of WiService V3

React.js · Redux.js · Node.js · AWS Lambda · Swagger

Supralog · Apprenticeship · Antibes (06)

JavaScript Apprentice Developer (React.js and Redux.js)

Jan. 2019 – Sept. 2019

> **CLARIS: Certification IS Overhaul** · 3 sprints delivered
>
> Within a team of seven developers, took part in the front-end overhaul of the CLARIS information system, built for **Eurovent Certita Certification SAS**, the European leader in certification.
>
> React.js · Redux.js · TypeScript · ChartJS

Full-Stack JavaScript Apprentice Developer (React.js, Redux.js, Next.js, Docker, GCP)

June 2018 – Mar. 2019

> **MyFFBaD: FFBaD Licensee Portal** · Delivered on time
>
> In a pair, from-scratch development of the front-end pages of the licensee portal of the **French Badminton Federation** (190,000 licensees) from the mockups and specifications, then implementation and deployment of 3 microservices.
>
> React.js · Redux.js · Next.js · NestJS · Docker · Kubernetes · Google Cloud Platform

Beepeers · Internship · Valbonne (06)

React.js Developer

May 2017 – Aug. 2017

> **Dream Nation Festival 2017: Event Website** · Delivered on time
>
> Design and development of the festival website, with a booking (ticket and hotel) and online payment system.
>
> - Design: screen mockups, architecture
> - React development, partly from existing components; ticket and hotel booking (Fasticket) and card payment (Weezevent)
> - Maintenance of existing AngularJS websites
>
> React.js · Redux.js · AngularJS

PROJECTS

Freelance projects

Study SARL · Kane Riviera Transfert · Trouillet Décors · Y-YServicies · Baby gifts

Personal projects

Chess game · Audio plugin store · Connect Four · Calculator

EDUCATION

Master's degree in Computer Science (MIAGE), MBDS track

2016 – 2019 · Université de Nice

Two-year technical degree in Computer Science (DUT)

2014 – 2016 · IUT de Nice

Preparatory class for engineering schools

2013 – 2014 · Polytech Marseille
